

Name: John Gregory

Position: Advisor

Key Experience:

John is a senior manager in the exploration and production business, experienced in gaining board support for large-scale oil and gas exploitation on a global basis. He achieves this by applying world-class technology, tools and practices and developing relationships with key organisations such as the service sector and DECC for business benefit. His main areas of expertise are petroleum engineering, field development planning and asset management.

John possesses excellent communication, management and reporting skills. He has a track record leading a large number of successful multi-disciplinary teams and projects.

Qualification Summary: BSc Honours in Applied Chemistry 1969 – 1973 (BP sponsored)
